Free Delivery

Registered sale animals from either sale location will be transported to the other sale location at our expense, so these cattle can be picked up at either sale location without cost to the buyer. If the buyer prefers, we can deliver any animals within the continental U.S. Registered females will be delivered for \$200 per stop plus \$75 for each additional female after the first, to the same location; and Registered bulls for \$300 per stop plus \$100 for each additional bull after the first, to the same location. Bulls may be combined with females for any one location. Commercial females will be delivered at cost, and we are happy to arrange transportation and combine loads to minimize cost.

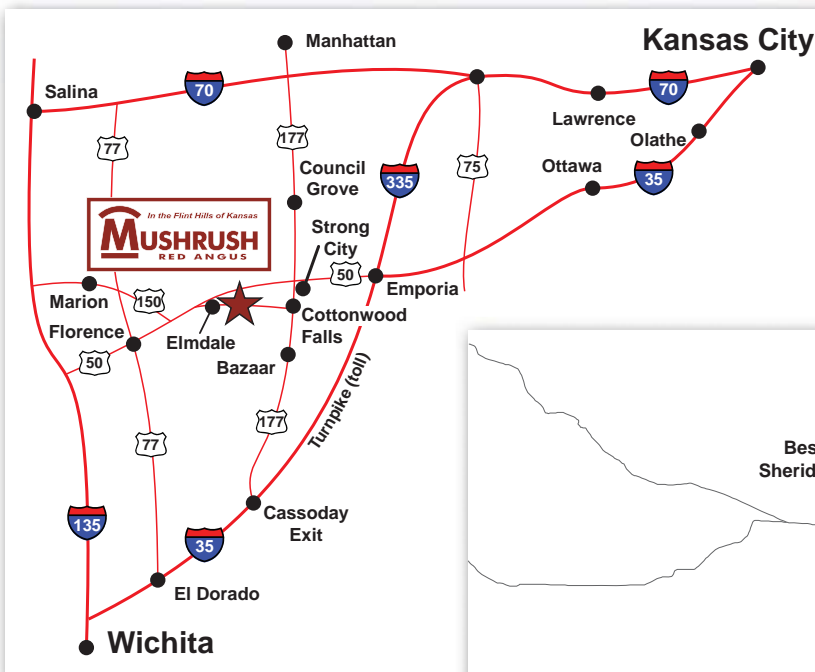

Sight-Unseen Purchase (by mail or phone)

If you are unable to attend the sale, we can help you select the animals to fit your needs. Give us a phone call, letter, fax or e-mail (please refer to the back cover), and we can make arrangements to handle bidding according to your directions. Cattle are bought at the lowest price, and satisfaction is guaranteed on animals purchased sight unseen. Many of our repeat customers buy their bulls and heifers this way.

To provide us adequate time to assist you, please contact us before noon of the day prior to the sale.

Payment

Payments can be made with cash, check payable to Beckton Stock Farm or Mushrush Red Angus, or Visa/Mastercard on sale day.

◀ From Elmdale

One mile East on the paved county road across Cottonwood River bridge to top of the hill. Turn left (North) to get to the barn. Watch for the overhead sign to your left.

◀ From Cottonwood Falls

Turn west on Main Street (first street south of the river bridge). Continue west for four miles. The sale barn overlooks a valley to your right. There is an overhead

From Sheridan ▶
Ten miles West on the paved county road 331 (Loucks Street) from Main Street. Turn right to get to the barn.

The Main Event

Two Powerful Red Angus Offerings, Two Locations, One Great Sale

The industry's first ever dual-site production sale! Watch and bid at Mushrush Red Angus Ranch or at Beckton Red Angus-or at home through DV Auction.

Monday, November 9, 2009
12 o'clock Mountain / 1 pm Central

125 Registered Females - 75 Bred Heifers and 50 Bred Cows
145 Commercial Females - 65 Bred Heifers and 80 Bred Cows
25 Bulls from our own breeding program

Beckton Red Angus

9½ miles West of Sheridan, Wyoming

Cam and Trish Forbes

Mushrush Red Angus

1 mile East of Elmdale, Kansas
Sale Day Phones: 620.340.7461 / 341.0745

Joe and Connie Mushrush

Beckton Red Angus is the Red Angus breed's founding herd. Started in 1945, it has since maintained the longest continuous performance testing and improvement program in the industry. Ninety-five per cent of our cattle sell to commercial producers, so our genetic selection program has always been able to produce cattle which will work for the commercial cattle person. There are no other cattle with this long history of performance-based genetic selection, so that today we believe our cattle do more things better.

Mushrush Red Angus has been in the cattle business for over 50 years and in the Red Angus business since 1982. In 1999, we joined with Beckton to offer you a good selection of predictable Red Angus genetics from two herds. Commercial cattle people at heart, we breed them the way we would want them if we were investing in Red Angus genetics for a commercial herd today.

This sale will be broadcast live on the internet.

DVAuction
Broadcasting Real-Time Auctions
Real time bidding & proxy bidding available.

Commercial Females sell first, followed by Registered Females and Bulls in Catalog Order

Additional Sale Information

How The Sale will Work

Mushrush's offering will be on display at their sale facility near Elmdale, Kansas. The Beckton offering will be on display at their Sheridan, WY sale facility. All sale cattle have been videotaped prior to Nov. 9th. In addition, the sale will be broadcast over the internet at DVAuction.com

If you wish to view the sale over the internet you must be a registered viewer at DVAuction.

If you wish to bid over the internet you must register as a buyer at DVAuction for this sale. Watch and bid online for free!

To register:

Visit **www.dvauction.com** and complete "register" & "applying to bid". DVAuction staff will contact you to let you know that you have been approved to bid. Please contact Dan Broz at 402-649-3172 or 402-474-5557 with any questions.

We recommend that you apply to bid 24 hours prior to the sale-every attempt will be made to complete your application in a timely manner.

Note: You must have high speed internet access (DSL, T1, or Broadband) to be able to bid during the sale.

You may view the sale and bid on the entire offering at either sale facility

Additional Notes

- ▶ Commercial Females sell first, followed by Registered Females and Bulls in catalog order.
- ▶ All animals are registered with the Red Angus Association of America, and registration certificates will be transferred to the new owners.
- ▶ All bulls selling have passed a rigorous fertility exam that included live semen evaluation, scrotal measurements, and reproductive tract examinations. All females were pregnancy tested by licensed veterinarians and were determined to be bred and to have sound reproductive tracts.
- ▶ Both herds have had a comprehensive herd-wide health program which includes vaccinations for 7-Way, IBR, BVD, PI3, BRSV, Lepto, and ivermectin or dectomax. The heifers are also vaccinated for brucellosis and vibrio.

Commercial Females	32-33	Mushrush Reference Sires	41-45	Lot-Tag Cross Ref	56

Dear Red Angus Enthusiasts,

The Forbes and Mushrush families are excited to invite you to our 2009 Main Event sale. Due to the technology of DV Auction we are able to provide you this exiting offering at either sale facility or from the comfort of your own home. As far as we know this is the industry's first ever dual site production sale.

Commercial cattlemen everywhere are searching for ways to reduce costs. They are finding that the easiest is through the use of low maintenance genetics such as those in this sale. Both herds continue to have the lowest Maintenance Energy EPD's of any major Red Angus herds. Both have been selecting for efficient cattle for many years. You can spend years trying to duplicate our results or you can add these already tested, proven genetics today! If you study the catalog you will notice that not only are the ME's the best in the industry, but calving ease, fertility, and carcass quality are added benefits as well.

The cattle industry continues to reduce inventory and is poised for a major economic recovery. Judicious use of low cost genetics such as those available here will have dramatic results at that time.

We invite you to either location on the ninth of November. The Mushrush offering will be on display at the Elmdale, Kansas sale facility and the Beckton offering will be on display at Sheridan, Wyoming. You may participate in the auction at either location. See the catalog for information on delivery options and for purchasing sight unseen with satisfaction guaranteed. If we can be of service, please give Cam or Joe a call.

Sincerely,

The Forbes and Mushrush families

Cattle Programs and Management

The Program - Efficiency

The goal for the Beckton and Mushrush programs has always been to develop breeding seedstock which offer increased levels of performance for the commercial cattleman. Increased performance does not mean maximizing weight and size, which have already reached the upper limit of economic value for the packer and consumer. It does, however, mean increasing performance related to calving percentage and weaning percentage;

and increasing performance related to cow maintenance requirements and “pounds of calf per acre” efficiency.

We select for growth, restricting birth weight and cow size creep, and multiplying each incremental change rapidly throughout our entire cowherd and all of our bloodlines. The overall key to success is simply that we have been making steady progress in multiple traits, and doing it consistently over a very long period of time.

The Program - Management

One Bull – the Simple Solution is the Best Solution

Keeping replacement heifers sired by Beckton and Mushrush genetics is the quickest way to limit cow size creep and to moderate cow size for the future. We get calving ease, growth, and moderate-sized replacements, all with the same bull while Breeding it into the cow herd.

Quietness and Ease of Handling

The necessity of record keeping means that our cattle will be handled much more than commercial cows. This benefits our seedstock customers because our cattle will be quieter and easier to handle. Good disposition is one of our most valued traits. Cattle are used to being handled horseback, with the 4-wheeler and on foot.

The Program - Additional Facts

Birth weight

- ▶ We have never used high birth weight sires in any part of our program, so big birth weights are rare.
- ▶ We get the pay weight, but with lower birth weights and greater calving ease.
- ▶ Full production from heifers. We use the same bulls on heifers and cows.

Hardiness

- ▶ Cows from both herds are true unpampered ‘range cows’ running in large native pastures. Every Beckton cow has spent part of her life in the Bighorn Mountain summer range at elevations from 7,000 to 10,500 feet. Good feet and legs are a must in these environments.

Growth

- ▶ Weaning efficiency, and rate of gain to slaughter weight second to none.
- ▶ Growth traits must be consistent with maintaining maternal qualities.
- ▶ Beckton and Mushrush cattle are ideally sized for today’s packer demand.

Value

- ▶ Beckton and Mushrush Red Angus produce more growth without high birth weights.
- ▶ They are the one-bull solution that can be used on both heifers and cows.
- ▶ Carcass quality is an extra benefit.

Efficiency

- ▶ The typical dam of our bulls weans over 50% of her body weight in 205 days, under range conditions, with no creep-feeding.
- ▶ The average dam produces over 100% of her own body weight in a year.

Integrity

- ▶ Beckton has been genetically improving Red Angus since 1945, while Mushrush Red Angus began over 25 years ago. Both programs have bred with a plan to produce functional, easy fleshing cattle that work in any environment.
- ▶ It is a complete, genetically sound breeding program, which demands whole-herd performance.

Fertility

- ▶ Every bull in our program is used in natural service, with 30-50 heifers/cows.
- ▶ Every cow in our program must cycle naturally and breed early under range conditions.

Registered Bred Heifers and Cows

The Registered bred heifers and cows in this sale were selected to provide a true cross sectional sample of our herds. Included will be heifers and young cows from young upcoming stars of the Red Angus breed, as well as from the proven performers such as LT142, B571, or F075. We are also sharing a group of donor quality matrons which include several dams of outstanding herd sires.

All of these females have been pregnancy examined by our veterinarians and are sold pregnant. We have listed the AI and pasture sires. (Since we use natural service, a female bred by a different sire could be possible, but we will always assist with DNA verification if desired.) Also, in the event any breeder is concerned about OS status, we have examined the past six generations of pedigrees of all females, and

verify that the sale animal has been tested OS Free, or that the six prior generations of every female listed show no OS Carrier. Every buyer can be assured that the females in the sale are the best available anywhere.

Because both of our programs believe in and practice rapid genetic advancement, you will find many of the sires being used are our newest and best genetics, even if they are not yet widely publicized. If you study the EPD's and performance records of these sires in our reference section, they will prove outstanding. Whether your primary interest is production, maternal traits, or reducing Maintenance Energy requirements, we think these are the most advanced animals in the breed today.

We are sharing some of our own B571 daughters now that they have replaced themselves in our herd with daughters of their own. The B571's are very nice maternal females, with solid production and many of the traits that are so hard to find elsewhere. Christy shows very nicely balanced EPD's, particularly high for heifer pregnancy and stayability. She was AI bred June 13 to Beckton Nebula M045, Reference Sire N-1, and pasture exposed to Beckton Nebula S543, Reference Sire N-6. Pedigree is 6+ generations OS clear.

Larkeisa P091 is a half sister to our #1 high selling bull this spring, and from the same Justice sire that produced the \$35,000 high selling bull in 2008. She is a very low maintenance energy, high producing young female whose calves average 109 at weaning and 106 at yearling. AI bred 6/15 to the past birth weight trait leader Beckton Nomad 9871 (#314536), and pasture exposed to Beckton Nebula S543, Reference Sire N-6. Pedigree is 6+ generations OS clear.

A rare own daughter of Beckton Epic F075. Larkabelle's calves have averaged 106 weaning ratio and over 100 at yearling. Her MPPA is 105. She herself weighs 1100 pounds even, is a very efficient, low maintenance energy cow and one of the highest for heifer pregnancy. Larkabelle is pasture exposed back to a young herd sire son descended from F075, Beckton Epic T330, Reference Sire E-4, so this is a unique opportunity to get a line-bred Epic calf. Pedigree is 6+ generations OS clear.

What a way to start the heifer sale! Combine the rare Julian LT 142 and Epic F075 and you get a heifer we really don't want to part with. Eight EPDs rank in top 25% of the breed (5 in the top 10%). Lana LT U003 showcases the perfect female. Breed leading stayability, heifer pregnancy, and maintenance energy. . 6+ gen OS clear [A.I. Sire N-1 (5/19), Pasture Exposure Ref. Sire C (5/25 - 8/3)]

Lydia offers two of the most important maternal traits – very low maintenance energy and longevity. The longevity comes from her dam, Lydia G059 who produced for us without missing a calf, for eleven years, with progeny averages of 103 weaning and 105 yearling. Pasture exposed to Beckton Epic T524, Reference Sire E-5. Pedigree is 6+ generations OS clear.

This Lancer F442 granddaughter from our long-running Firefly cow line exhibits strong maternal traits, with very low maintenance energy EPD and high milk, and a very moderate 985 pound size this fall. Her two calves are averaging 102 ratio at weaning, and last year's calf was 107 at yearling, so she produces strongly and efficiently. Pasture exposed to Beckton Epic S569, Reference Sire E-3. Pedigree is 6+ generations OS clear.

The Coca F370 dam of this heifer is another of the grand matrons at Beckton. She will produce her 12th calf for us next spring. This daughter comes from Julian B571 on the sire side, and has an impressively low -5 maintenance energy EPD. Pasture exposed to Beckton Likable U091, Reference Sire L-4. Pedigree is 6+ generations OS clear.

Mushrush Commercial Bred Heifers

The Mushrush commercial bred heifers are solid red with high enough percentage to be considered purebred Red Angus. We buy these heifers as calves from bull customers that have been using Mushrush and Beckton genetics for many generations. They are typical of our breeding program - moderate framed, easy fleshing cattle with lots of natural thickness and capacity. We bred over 400 of these this year and held back this elite group especially for this sale. All heifers have a negative BVD - PI test and were vaccinated three times prior to breeding with BoviShield Gold

FP+VL5™ which includes Vibrio and Lepto. All heifers were OCV for brucellosis. They were bred to calving ease Mushrush and Beckton bulls for a 65 day calving season starting February 15, 2010. We use a lot of bulls so typically the heifers are bred up in the front half of the season. At preg check the heifers were boosted with ViraShield 6™ and poured with Dectomax. Their calves will be eligible for the Red Angus Feeder Calf Certification Program. These heifers typically weigh right around 1000 pounds at preg check in October.

Lot 201 and following

We expect around 50 head, depending on preg check of these fancy heifers. They will be individually lotted starting at Lot 201. The high bidder takes as many as they want, one to all. We will repeat until all heifers are sold. If you will be bidding on DV Auction, please watch the bidding tutorial. It will help you to communicate the number you are buying.

Beckton Commercial Bred Heifers and Cows

These bred heifers and cows are from the Beckton program. They are all very high percentage Red Angus, solid red, bred and raised here at Beckton. Their calves will be eligible for the Red Angus Feeder Calf Certification Program. The heifers are bred to calve starting the second half of February, and the cows are bred to start calving early March. All have been pregnancy tested and examined for reproductive tract soundness by our veterinarian. All are bred to our own Beckton Red Angus sires.

They are very moderate in size and frame, with low maintenance energy requirements for which our program is well known. It is difficult to find moderate sized, productive females, and these are bred to be just that. Over the years these cows have proven to give both performance and value to our commercial female customers.

Lot 301

15 – Beckton 18 mo. Bred Heifers – high percentage Red Angus

Lot 302

15 – Beckton 2-3 year old Bred Cows – high percentage Red Angus

Lot 303

50 – Beckton young Bred Cows – average age 4 1/2 yrs. – high percentage Red Angus
(These will be sold gate cut, and the high bidder may take as many as he/she wants)

Beckton Program Bulls

Be ready to go out early with your bulls next year...

At Beckton we use primarily a natural service breeding program. Every year we add about 15 new yearling bulls from the top end of our breeding program, plus some back-ups. Which means every year we need to retire this many bulls. Because these sires turn over so quickly, many are quite young. We have put together 27 of these retired and back-up bulls. These are high performance bulls only 2 to 5 years of age.

They have only been used with our own cows. We are selling full possession of these bulls, and are retaining a ½ breeding interest only.

These bulls offer tremendous performance and value, and should have many good years of service remaining.

Sale Terms and Conditions

Except for those stated in the terms and conditions below, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy for the Buyer, or any party claiming through Buyer, for any breach of warranty

I. BIDDING

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

II. TERMS

Terms of sale are cash or personal check unless satisfactory credit arrangements have been made with vendor prior to sale.

III. PURCHASER'S RISK

Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the Seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

IV. DELIVERY

For any animals for which seller's arrange delivery, the following terms shall apply. Each animal becomes the risk of the purchaser as soon as sold, and through the time of delivery. The seller will arrange transportation and delivery schedules, and may combine animals from one or more purchasers for convenience and to reduce costs. If delivery is arranged, seller assumes no other liability. Once the purchaser has been notified of the date and approximate time of delivery (morning, afternoon, evening, etc.), it is the responsibility of the purchaser to arrange adequate and agreeable location and facilities for unloading each animal. When unloaded at the agreed upon location, all care and management of the animal is the responsibility of the purchaser.

V. CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the purchaser for each animal sold as 'Registered'.

VI. HEALTH

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal requiring T.B. and Bang's tests in accordance with Federal Regulations.

VII. A.I. NON-OWNER BULL PERMITS

A.I./Non-owner Bull Permits shall be furnished by the Seller, at no cost to the Buyer, for all females bred artificially or naturally to bulls not owned by the Seller.

VIII. ANNOUNCEMENTS

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

IX. BREEDING GUARANTEE

Any female that has had a calf prior to the date of sale shall be considered a breeder without further guarantee. All females sold as 'bred' or 'pregnant' have been pregnancy checked by a licensed veterinarian and are guaranteed bred on the day of sale. The purchaser may elect to have any female so listed rechecked at their cost within 30 days of delivery by a licensed veterinarian of their choice. Any such female determined

or guarantee therein provided, and all other obligations or liabilities.

The information in the catalog is believed to be accurate, and the information seller believes to be most representative. It is the nature of seller's business that the seller engages in a continual process of collecting new data and information. Therefore, any information presented at the time of sale is always subject to revision, correction or update.

open by this recheck may be returned to the seller for a full refund. Due to conditions out of seller's control, once a female leaves seller's possession, this is the only guarantee offered.

All bulls are sold as guaranteed breeders. Each bull has been officially fertility tested as "Satisfactory Breeder" prior to the sale. However, seller cannot guarantee against physical injury or illness following the sale. But if within 8 months following the sale, the buyer has evidence that the animal is not a breeder, the buyer may obtain a statement signed by a licensed veterinarian to that effect, such statement also indicating that there has been no injury or illness to the animal following the sale, and return the bull to the farm of the seller for adjustment. If the seller cannot then prove the animal to be a breeder, an adjustment will be made by the seller, either by substituting an animal of equal value, or by the refund of the full purchase price. Such adjustment shall be considered full settlement and satisfaction of all claims. No guarantees apply to animals which are shown following the sale.

X. GENETIC DEFECT AND PARENTAGE GUARANTEE

For complete rules and regulations in regard to genetic defects or parentage guarantee contact the RAAA. Ask for Section C Registration Requirements. At time of sale all animals sold as 'Registered' have been tested OS Free, or have pedigrees that have been verified to have no RAAA listed carriers of OS for six complete generations.

XI. RETAINED INTEREST AND SEMEN RIGHTS:

Buyer receives full possession and salvage value of all bulls in the sale, unless stated otherwise in the catalog or during the auction. On animals designated in the catalog or from the auction block, Seller is retaining an undivided 1/2 interest or other interest as stated. Designation of interest may occur on an animal's individual listing, or in an introduction preceding a group of animals. We reserve the right to collect and market semen on these bulls. Collection would be during the off season, at the buyer's convenience, and at seller's expense. The buyer has the option of obtaining semen at the same time, at cost, provided we are notified ahead of collection. If the buyer collects the bull, we would like to be notified so we may obtain semen if wanted.

On all other bulls in the Sale, except those so designated, the buyer has full possession, and shall have the sole privilege to determine if the bull is to have semen collected at any time in the future. On such bulls which are collected in the future, and from which semen is advertised or marketed commercially, seller retains a 1/3 royalty interest on gross sales price for any semen which is sold; however, any decision to collect or sell semen is solely the right of the buyer.

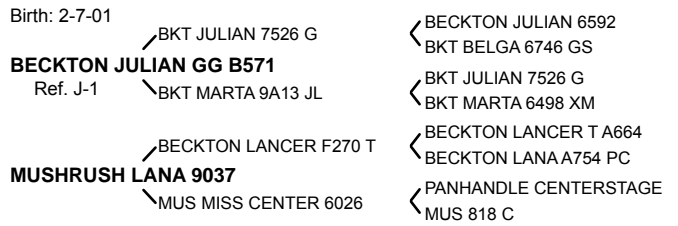

XII. RIGHTS AND OBLIGATIONS

A. The above terms and conditions of sale shall constitute a contract between the Buyer and Seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

B. Neither the sale manager, the owner, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.
