Red Angus

Foundation Herd of the Red Angus Breed

1 Beckton Red Angus

37 Beckton Drive • Sheridan, WY 82801 • becktonwyo@gmail.com
Office: 307.674.6095 • Evenings: 674.8162 • Fax: 672.7281

Dear Friends and Cattlemen,

Welcome to our 79th Anniversary Bull and Heifer Sale. Now more than ever, there is good reason for optimism for the beef cattle industry going forward. Challenges with packer capacity and Covid are behind us. The nation's cow herd continues to decline, while beef demand has never been stronger. Cattle prices are heading to record levels.

We have a great set of bulls and heifers this year. Beckton Red Angus have long been known for easy calving, rapid early growth, and for producing excellent breeding females. Docility and functional traits are strong assets. With so many in the beef industry chasing terminal cross traits, we offer the sires and the genetics that produce females with moderate size and efficiency, the foundation of a profitable cow herd in all environments and economies.

Beckton bulls have long been the gold standard for breeding first calf heifers. Another quality that stands out is how many of the sale animals come from excellent dams. We include complete information on the dams of each sale animal, including each mother cow's actual age and weight, and her progeny record for her calves. Additional information including ultrasound and veterinarian scrotal measurements will be available at or before sale day. We believe that our genetics in this sale will help you build the best possible cowherd for long term success.

The catalog format has been re-organized to provide more physical information about both bulls and heifers. A question we frequently get asked is, "What do they weigh?" In answer, we are giving the actual measured weight of each sale animal as taken early this winter. Right below it, the "May 15 Projected Weight" gives what the bull or heifer would be projected to weigh if there were no bull sale or delivery, but instead was kept on a conservative feeding regimen (3 lbs. ADG for bulls and 2 lbs ADG for heifers) until a May 15 "turn-out" date.

As for other changes, our Reference Sires section has been moved to our website - 'becktonredangus.com'. It will now be available to our customers year-round, instead of just once a year in the catalog. Lastly, our post-sale dinner will be hosted at the ranch sale barn shortly after the sale. You can grab a quick bite if you need to get on the road. Or you may sit down with us and stay awhile for a relaxed visit. Please join us if you can. We look forward to seeing you.

Sincerely,

Cam Forbes

Since 1945
Angus Breed

79th Anniversary Production Sale

Some Facts about the Beckton Herd

Beckton has long been one of America's premier breeders recognized for genetics which combine a genuine balance of desirable traits - calving ease, maternal traits, and rapid growth to yearling age. They are a leading choice for commercial replacement females and for building a great cow herd. And the lower birth weights make them a first choice for breeding heifers.

HERD STAYABILITY: Beckton is the #1 Herd in the Red Angus breed for Stayability, and has been for many years. 15 of the top 20 highest ranking sires in the breed for **Stayability EPD** are Beckton sires or descended from Beckton sires.

EASY CALVING: Beckton has long been the choice for easy calving sires that still have gain and growth. **9 of the top 10** highest ranking sires in the breed for **Calving Ease EPD** (and 44 of the top 50 sires) are Beckton sires or descended from Beckton sires.

CARCASS QUALITY: For **Marbling EPD**, **8 of the top 10 highest ranking sires** (and 44 of the top 50 sires) are Beckton sires or descended from Beckton sires. Beckton genetics are very popular for grass fed and natural beef programs. Raised and developed on our short grass and mountain pastures here in northern Wyoming, and upgraded from Angus origins, they are a natural source for these private beef marketing programs. We have regular bull customers from California to Texas to Maine and most states in between, who want our genetics for **easy marbling, early maturity, ability to gain on grass and roughage, and high scoring beef tenderness.**

MODERATE MATURE SIZE: One characteristic of Beckton cattle which makes them ideal for producing replacement females and building a low cost, efficient cowherd, is the **moderate mature size**. Page 5 shows the results of decades of genetic selection. We believe we have the best genetics for **Efficiency** that can be found anywhere.

217 Bulls - 34 Heifers

Tuesday, April 9th, 2024

1:00 pm (Lunch at noon)

At the Beckton Ranch

37 Beckton Drive

9½ miles West of Sheridan, Wyo.

Phone: 307.674.6095

Please join us for a complimentary dinner on-site right after the sale ends. You may grab a bite and go, or stick around a while and visit.

Free Nationwide Delivery

Two or more bulls to one location get free delivery throughout the continental United States. Single bulls or three or more heifers to one location receive 600 miles free delivery, with additional miles at cost. Most of our sale animals are delivered by pick-up and trailer, so we can deliver them right to your ranch and unload in your corral, or other location convenient for you. If weather, load size, or other factors present limitations, we will try to make other acceptable arrangements.

Most of the sale animals will be delivered within three weeks of the sale. We can often rearrange timing among loads if you need your animals in a hurry, or if you prefer to delay a bit.

\$200 will be deducted from the price of each bull if you bring a trailer and haul your own.

BULL/HEIFER WARRANTY: optional protection against injury or death, plus pregnancy coverage for heifers

BULLS: Injury or loss protection coverage - If your bull is permanently injured or dies any time up to 5 months after purchase, you will receive a credit toward purchase of another bull in the amount of the original purchase price minus salvage. The cost is 5% of the purchase price paid at settlement (eg. \$150 for a \$3,000 bull).

HEIFERS: Injury or loss protection plus Pregnancy Guarantee - likewise good for 5 months after purchase. If your heifer fails to become pregnant when exposed to a bull who settles 75% of the other heifers in the same pasture; or in the event your heifer is permanently injured or dies, you will receive a credit toward purchase of another heifer in the amount of the original purchase price minus any salvage. The cost is 10% of the purchase price paid at settlement (eg. \$200 for a \$2,000 heifer).

Sale Information

Details

Health Program: Beckton has a comprehensive herd-wide health program which includes vaccinations for 7-Way, IBR, BVD, PI3, BRSV, Lepto, and ivermectin. The heifers are also vaccinated for bangs and vibrio.

Fertility Tested: All bulls have passed a rigorous fertility exam that included live semen evaluation, scrotal measurements, and reproductive tract examinations.

All Bulls "Trich" Tested: In all the years we have been selling and delivering bulls, Beckton has never had a bull test positive for "trich". But because an increasing number of states require testing of yearling bulls, and to avoid any delay in delivery time, we will have all the sale bulls tested negative for "trich" prior to the sale. Customers from any state may also come to the sale with their trailer and load out directly after the sale.

Osteopetrosis Tested: When a genetic test was developed by RAAA for osteopetrosis (OS), Beckton tested every sire in use in our program, as well as our major AI sires. Every Beckton bred sire (nearly 80 in total) tested OS Free.

Semen Interest Retention: Buyer receives full possession and one half semen interest in all the bulls in the catalog. Seller is retaining one half interest in all bulls in the catalog. This is done so we can use some of the bulls in herd and reserve the right to collect and market semen on these bulls. Any collection on our behalf would be at our expense and could be done during the off-season and at the convenience of the buyer. The buyer would have the option to share in the collection and retain semen for the buyer's use also. If semen is marketed by either party, Seller receives one half royalty interest on gross semen sales, and buyer receives one half interest. Regardless of semen collection and marketing, the buyer retains full possession, full pasture use rights, and full salvage value in these bulls.

Payment: Payments can be made with cash, check payable to Beckton Stock Farm, Inc. or Visa/Mastercard on sale day.

How to Participate as an Absentee Bidder

Buyers purchasing via Superior or Pelton Livestock can mail a check after the sale with brief delivery instructions and an approximate date you would like delivery by. If you would like to pay with a credit card, please call the office the day after the sale.

1. Site-Unseen Purchase

If you are unable to attend the sale, we can help you select the bulls or heifers to fit your needs. Give us a call, letter, fax or email, and we can handle bidding for you according to your directions. Satisfaction is guaranteed on all animals purchased "sight-unseen". Over a quarter of our bulls sell this way, mostly to long-time and repeat customers. To provide adequate time to assist you, please contact us before sale day.

2. Superior Livestock Productions: Two Options

The auction will be broadcast online; pre-recorded videos will be hosted prior to and on sale day. You do not need an account or login just to watch the auction. Pre-register at Bid.SuperiorLivestock.com prior to the sale, and then select one of the following methods to bid:

Online Click-To-Bid. Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account if you wish to bid (there is no registration required just to watch the auction). Once you have created an account, request a buyer number and you will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!

OR

Turn in Bids Over the Phone. This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.

For help with registration or any part of the bidding process please call Superior at (800) 422-2117.

3. DVAuction Online Auction Platform

Can't make the sale? Let DVAuction bring the sale to you! Busy during the sale? Let DVAuction represent your bid! It's as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "create new account" tab.
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction.
3. Tune into the sale and make your purchases!

4. Sale Day Conference Call

Contact the ranch office at 307-674-6095 for instructions.

The Beckton Program

Beckton has used per
believe our catt

Beckton's Efficiency Gain

Over the past 46 years, Beckton has been selecting for increased early rate of growth (to slaughter age) while holding cow weights constant. We have accomplished this by selecting for growth, restricting birth weight and cow size creep, and using rapid generation turnover to multiply each incremental change rapidly throughout our entire cowherd and all of our bloodlines. We have seen a dramatic increase in economic efficiency. **Our average cow weighs the same or a little less than what she weighed in 1978, but our average yearling weight is 124% of what it was in 1978.**

The U.S. cattle industry has also been increasing average steer slaughter weights, but industry-wide there has been no effort to control cow size. Industry cow weights, as indicated by USDA cull cow slaughter weights, are increasing just as fast as steer and heifer weights. (128% higher than in 1978, about the same as steers given the lag time before cows are culled). **Over 46 years, there has been minimal improvement in overall cow herd efficiency.** The increase in growth and value of market animals is being largely offset by the increase in feed requirements and maintenance cost of the mother cow herd.

The accompanying graphic shows the increase in efficiency of Beckton cattle compared to the U.S. beef industry. In the

promotion of composites, the impact of retained heterosis on mature weight is too often ignored. Cross-breeding and composite breeding have done little more than simply increase general cattle size. Crossbreeding and composites are sold as a free lunch, but they aren't free.

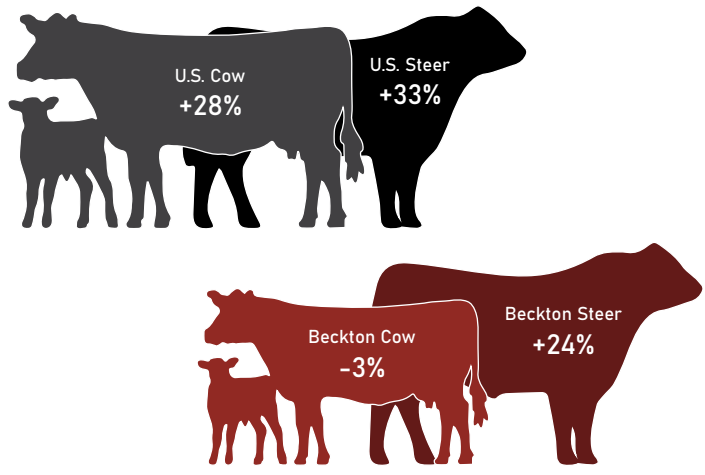

Cow Efficiency

By keeping cow size down, you can run more cows, and harvest more calves, on the same amount of grass. You can also reduce supplement feed costs. For each dam in our catalog, we give a measure called "PRI Cow Efficiency", which was created by ag scientists decades ago. Cow Efficiency measures calf weaning weight relative to the cow's metabolic weight (how much she eats), and is expressed as an index above or below 100.

These efficiency measures are best used as indicators of where an animal is relative to others, rather than directly for selection. For example, if we see an animal with a low efficiency, we would look at the actual calf and cow weights to decide if the calf is too small, or the cow too big for the environment. That in turn will suggest corrective actions. In general, select for the traits you need to change to make cattle more efficient, and efficiency will be the result.

Performance tested selection since 1945, and we believe the cattle today are the most efficient in the industry.

Dam Information

A major difference with our catalog is the greater amount of information about the dams we provide. Cow Efficiency is explained earlier. In addition, with each sale animal we give the dam's age when this calf was born, and the dam's actual weight when the calf was weaned the previous fall. We also provide her progeny averages — the average birth weight, weaning ratio, and yearling ratio — of her calves.

Beckton Performance

- Birth weight**
 - ★ Every sire entering our own program is used first on our own heifers, then on our cows.
 - ★ We have never used high birth weight sires in any part of our program, so big birth weights are rare.
 - ★ We get the pay weight, but with lower birth weights and greater calving ease.
 - ★ Full production from heifers. We use the same bulls on heifers and cows.
- Growth**
 - ★ Weaning efficiency, and rate of gain to slaughter weight second to none.
 - ★ Growth traits must be consistent with maintaining maternal qualities.
 - ★ Beckton cattle are ideally sized for today's packer demand.
- Hardiness**
 - ★ Every cow in the herd has spent part of her life in the Big Horn Mountain summer range, at elevations from 7000 to 10,500 feet.
 - ★ In 2001 we PAP tested all of our herd sires. The herd average PAP score was 32.5 at 4000', equivalent to a herd average PAP of 39 at 8000' (excellent scores).
 - ★ By the time she is 5, our average cow will have been trailed over 80 miles, above and beyond normal pasture rotation.
- Efficiency**
 - ★ The typical dam of our bulls weans over 50% of her body weight in 205 days, under range conditions, with no creep-feeding.
 - ★ The average dam produces over 100% of her own body weight in a year.
- Fertility**
 - ★ Every bull in our program is used in natural service, with 30-50 heifers/cows.
 - ★ Every cow in our program must cycle naturally and breed early under range conditions.
- Value**
 - ★ Beckton Red Angus produce more growth without high birth weights.
 - ★ They are the one-bull solution that can be used on both heifers and cows.
 - ★ Carcass quality is an extra benefit.
- Reliability**
 - ★ Beckton has been genetically improving Red Angus since 1945, a 30-60 year lead time over other producers.
 - ★ It is a complete, genetically sound breeding program, which demands whole-herd performance.

Beckton History

Beckton is one of the oldest ranches in the Sheridan, Wyoming area. It came into Forbes family ownership in 1899, and has grown since then. The home ranch lies in the foothills of the Bighorn Mountains, near the original Bozeman Trail. The site of the current ranch headquarters once included a post office and flour mill, founded by George Beck, from whom came the name "Beckton". George Beck's house, built in 1887, now serves as the Beckton ranch office.

In 1936, Waldo Forbes took over management of the Forbes family ranch. Waldo was interested in applying to beef cattle the ideas of performance testing and genetic selection for economically important traits. Waldo married Sal in 1939, just before World War II, and the two of them embarked on the undertaking that would make a contribution to the future direction of the beef industry — the establishment of an entirely new breed of cattle to be based on selection by performance traits of economic importance.

They bought top red calves from 18 leading registered Black Angus herds across the United States, using these red cattle to build the foundation herd of a new breed that was independent of existing breed associations. During the next decade, Beckton added many more red bulls and females from registered Black Angus herds. From early on, Beckton was active with crossbreeding their new Red Angus sires into their existing commercial Hereford herd, to create dual herds — one purebred Red Angus, and the other high-percentage Red Angus from the Hereford base. Today the two herds run side-by-side, sharing the use of our Red Angus sires.

In 1954 this new breed was formally established when the Red Angus Association of America was founded with performance testing as the cornerstone of breed improvement. Waldo served as the first president of the association until his death at the end of 1955. Sal served as the association's first Executive Secretary.

Today Beckton is the oldest and one of the largest Red Angus herds in the country, running approximately 1050 mother cows, 350 replacement females, and 100+ bulls (as

well as several hundred deer and elk) on 15,000 deeded and State lease acres. Each year, much of the cowherd is moved to high mountain pastures in mid-summer. The ranch grows all its own hay, primarily as grass-alfalfa mixes.

The forage and other resources are managed as much for information as for production. Simply put, we don't manage the cattle to maximize weaning weights or even conception rates. Our business is maximizing information; therefore the cattle are pushed far beyond industry norms. For example, 90% of the main cowherd is bred in single sire pastures at a rate of 40-50 cows per bull. The other 10% of the cowherd is bred AI. Heifers are divided into groups of 20-30 per bull. All yearling bulls potentially

entering our program are used with a heifer group first, for comparative progeny testing and calving ease evaluation. Every bull in our program must be able to be used without difficulty on first-calf heifers as well as older cows.

Likewise, the stocking rate we use is higher than other purebred or commercial ranches would use in our area. The

Beckton Larkabeau O "220" in 1959, the 1st Red Angus Bull at ABS.

high stocking rate plus the scattered nature of our pastures and the high mountain ground, means the cattle are moved frequently. We once calculated that by the time she is five, our average cow has been trailed (not trucked) over 100 miles.

Our product is a package of genetic improvements which contribute to the production efficiency of other growers, both commercial and purebred. The value of our product derives from the information we can provide about its likely performance, combined with the reliability and consistency of our quality control. We use random mating almost exclusively to get meaningful and statistically unbiased data.

We believe that the most important livestock component of a commercial ranch is its cowherd, the focus of nearly all ranch costs. The cow is a production unit, with a set of costs attached, so the data we collect has to relate to the economics of that unit. The overwhelming share of operating costs depends on the quantity of feed required, not on the number of cows being run. For example, the cost of building and maintaining fence depends on the size of the pasture, not on the number of cows within the pasture. A focus on production efficiency has kept our cow size quite stable over the years. Birth EPD's give us an effective selection tool for managing mature size. We have also steadily improved the post-calving, pre-slaughter growth rate.

In summary, we have four basic production goals; to maximize the validity, usefulness and repeatability of our genetic information; to maximize the health and lifetime production capabilities of the animals we sell; to maximize the sustainability of our own natural resources, and to do all these things in the most efficient and cost-effective way possible. Ultimately, our success is measured by the success of the commercial beef producers who use our genetics.

Beckton house/office in 1899. The antlers are still on the porch, and it is one of the oldest buildings in Sheridan County.

Sal and Waldo enjoyed square dancing.

Young Sal Forbes up on the mountain.

1960s Beckton Sale with Berdon's broadcast van.

The Bulls

Our bulls are managed in a manner to gain important performance data and information, and equally importantly, to develop and provide our customers with many years of productive service. We have been testing breeding bulls over 50 years, longer than almost any other producer. Our own breeding is based primarily on natural service, not AI, so we see how our bulls work in the pasture. We use bulls raised and managed just this way, with our own cows and heifers, on every kind of terrain, and high in the Bighorn Mountains.

Prime and Proven Registered Cows

Beckton females are nearly ideal for today's industry – moderately sized, efficient producers. They combine calving ease, growth, and desirable carcass traits. They are feminine, maternal and quiet, with nice udders and sound feet. All of our heifer calves trailed up with their mothers into the Bighorn Mountains to spend their first summer. They have learned the meaning of mothering ability. And they have the productive

capacity to produce the bulls that you see in our sale. The sale heifers are a select group from the top of our replacements.

If you wish, we can also keep any sale heifers through the summer and breed them in natural service to the same herd sires we use with our own replacements. There will be a charge of \$250 per heifer plus delivery at cost in the fall. Visit with Cam about this program.

Beckton is offering two straws of P707 semen or any other sire (for which we have adequate supply) to go with every heifer purchased. The buyer will only be responsible for shipping from Billings, MT and semen may be used on any animal the buyer would like.

EPD Accuracies and Possible Change

EPDs are predictions, not true values, and we can therefore expect that EPDs will change from sire evaluation, as more information (i.e. progeny data) is included. A possible change value is an estimate of the amount of change (in trait units) that can be expected for a given EPD.

Technically, there is a 68% chance that the real genetic value (an EPD with an accuracy of 1.0) for any trait lies between its EPD plus its possible change value and its EPD minus its possible change value. For example, if a sire has a weaning EPD of +25 lb. and a possible change value of 10 lb., we can expect the true genetic value to be between +15 lb. (25 - 10) and +35 lb. (25 + 10) 68% of the time. We should not be surprised if his EPD in next year's evaluation is as high as +35 or as low as +15. If next year's EPD should happen to be slightly outside of this range, keep in mind

there is nearly a one-in-three chance of that happening; however, significantly larger deviations can occur.

Possible change is simply another way of expressing accuracy of an EPD. High accuracy sires will have small possible changes and vice versa. Many breeders feel that possible change values complement accuracies and help them determine just how thoroughly an animal has been evaluated. The accuracy/possible change chart lists possible changes in EPDs that can be expected with different levels of accuracy for the various traits.

For more information on possible change values, please see the article by Dr. Bob Hough titled "Understanding EPD Accuracies and Possible Change". This article can be downloaded from the Red Angus Association of America website at www.redangus.org.

Sale Terms and Conditions

Except for those stated in the terms and conditions below, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy for the Buyer, or any party claiming through Buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

The information in the catalog is believed to be accurate, and the information seller believes to be most representative. It is the nature of seller's business that the seller engages in a continual process of collecting new data and information. Therefore, any information presented at the time of sale is always subject to revision, correction or update.

I. BIDDING

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

II. TERMS

Terms of sale are cash or personal check unless satisfactory credit arrangements have been made with vendor prior to sale.

III. PURCHASER'S RISK

Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the Seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

IV. DELIVERY

For any animals for which seller's arrange delivery, the following terms shall apply. Each animal becomes the risk of the purchaser as soon as sold, and through the time of delivery. The seller will arrange transportation and delivery schedules, and may combine animals from one or more purchasers for convenience and to reduce costs. If delivery is arranged, seller assumes no other liability. Once the purchaser has been notified of the date and approximate time of delivery (morning, afternoon, evening, etc.), it is the responsibility of the purchaser to arrange adequate and agreeable location and facilities for unloading each animal. When unloaded at the agreed upon location, all care and management of the animal is the responsibility of the purchaser.

V. CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the purchaser for each animal for which a Registration number is listed.

VI. HEALTH

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal requiring T.B, Bang's, and trich tests in accordance with federal and state regulations.

VII. DIVISIBILITY

The percentage of ownership interest received by the buyer, whether it is 100% or 2/3 or otherwise as defined in the catalog or by the auctioneer, may not be subsequently divided without the express written consent of the seller.

VIII. ANNOUNCEMENTS

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

IX. BREEDING GUARANTEE

Any female that has had a calf prior to the date of sale shall be considered a breeder without further guarantee. All females sold as 'bred' or 'pregnant' have been pregnancy checked by a licensed veterinarian and are guaranteed bred on the day of sale. The purchaser may elect to have any female so listed rechecked at their cost within 30 days of delivery by a licensed veterinarian of their choice. Any such female determined open by this recheck may be returned to the seller for a full refund. Due to conditions out of seller's control, once a female leaves seller's possession, this is the only guarantee offered.

All bulls are sold as guaranteed breeders. Each bull has been officially fertility tested as "Satisfactory Breeder" prior to the sale. However, seller cannot guarantee against physical injury or illness following the sale. But if within 8 months following the sale, the buyer has evidence that the animal is not a breeder, the buyer may obtain a statement signed by a licensed veterinarian to that effect, such statement also indicating that there has been no injury or illness to the animal following the sale, and return the bull to the farm of the seller for adjustment. If the seller cannot then prove the animal to be a breeder, an adjustment will be made by the seller, either by substituting an animal of equal value, or by the refund of the full purchase price. Such adjustment shall be considered full settlement and satisfaction of all claims. No guarantees apply to animals which are shown following the sale.

X. GENETIC DEFECT GUARANTEE AND PARENTAGE

All parentage and pedigrees presented in the catalog are believed accurate based upon the breeding and DNA information we have available. However, parentage and pedigree information cannot be guaranteed 100%, because it is always possible that new information or new DNA technology and testing might show that there have been inadvertent errors.

Osteopetrosis: The Red Angus Association along with animal scientists have developed a DNA marker test for osteopetrosis (OS), a genetic disorder which in rare instances can cause the loss of a calf at birth. Since the test was developed, Beckton has tested every sire being used in our breeding program. Only one sire, from outside our program, tested positive as a carrier of the gene. Every sire bred and raised at Beckton has tested 'Free'. All of our major semen sires have also been tested 'Free'. We guarantee every sale animal to be OS Free, and if you have a concern, we will have any sale animal tested on request. If an animal were to test positive, we would replace the animal or refund the purchase price. The testing we have done shows no incidence of occurrence in any Beckton bloodlines for the past 30 years, and so we believe there is no safer herd than ours.

XI. RETAINED INTEREST AND SEMEN RIGHTS:

Beckton is selling full possession and one half semen interest in all the bulls in the catalog. Seller is retaining one half interest in all bulls in the catalog. This is done so we can use some of the bulls in herd and reserve the right to collect and market semen on these bulls. Any collection on our behalf would be at our expense and could be done during the off-season and at the convenience of the buyer. The buyer would have the option to share in the collection and retain semen for the buyer's use also. If semen is marketed by either party, Seller receives one half royalty interest on gross semen sales, and buyer receives one half interest. Regardless of semen collection and marketing, the buyer retains full possession, full pasture use rights, and full salvage value in these bulls.

XII. RIGHTS AND OBLIGATIONS

A. The above terms and conditions of sale shall constitute a contract between the Buyer and Seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

B. Neither the sale manager, the owner, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.
