## Welcome to the Halfmann-Beckton Red Angus Sale!

Dear Friends,

We welcome you to join us for the 2016 Halfmann-Beckton Red Angus Sale on Wednesday October 5th. The Red Angus breed is becoming the breed of choice for commercial cattle producers and we believe we have the right kind of Red Angus cattle for profitability into the future.

The Red Angus Association's new HerdBuilder Index is now being used across the breed as a predictor of profitability. This index is a composite of several important EPDs and is expressed in terms of dollars valued per calf. For example, a bull with a HerdBuilder Index of 150 will produce \$50 more value per calf than a bull with an index of 100. Mated to 150 females over his service lifetime, that equates to \$7,500 total more value than the lower indexing bull. For more information on EPDs and indexes, please read through pages 6-9, or we would be glad to visit with you.

We are very excited about the group of cattle we are offering this year. We put a lot of work into developing and selecting this group of bulls and females. As you go through them, you will see the quality is solid from top to bottom.

Please join us the evening before as we will have our Customer Appreciation steak dinner with guest speakers Gary Fike, the Red Angus Director of Commercial Marketing, and Jason Barber of Superior Productions. If you are unable to attend the sale, please call us prior to the sale to arrange phone bidding or Sight-Unseen orders. You can also join us on sale day through Superior via phone or online.

We look forward to seeing you soon!

## Sale Location

### Halfmann Ranch

From San Angelo, Texas, head east on US 67 to Miles, proceed through Miles for 2.4 miles. Left onto County Road 357 to ranch.

From Ballinger, Texas, head west on US 67 to Rowena, proceed through Rowena for approximately 6 miles. Turn right onto county road 357 to ranch. Geographical location: 31.610411,-100.144257.

Scan the QR code to receive directions on your mobile device.

## Airline Info

### San Angelo Airport Regional Airport

American Airlines flies into San Angelo, Texas (30 miles from Halfmann Ranch).

### Midland International Airport

Continental and Southwest Airlines fly into Midland, Texas (125 miles from Halfmann Ranch).

## Hotel Accommodations

### Courtyard by Marriott, San Angelo

2572 Southwest Blvd 325-703-6400

### Holiday Inn Express, San Angelo

4613 W Houston Harte Expressway 325-223-2200

### Comfort Suites, San Angelo

4450 W Houston Harte Expressway 325-944-8600

### Candlewood Suites, San Angelo

4587 W Houston Harte Expressway 325-947-9400

### Executive Inn, Ballinger

1005 Hutchins Ave 325-365-5717

## Online Supplemental Information:

Color photos, supplement information, videos and color catalog available at: [HalfmannRedAngus.com](http://HalfmannRedAngus.com)

## Cattle Viewing

Videos are available online at [www.HalfmannRanch.com](http://www.HalfmannRanch.com). Cattle will be available for viewing at 12 pm the day prior to the sale. All bulls, registered females and Halfmann commercial females are located at Halfmann Ranch in Miles, Texas. All other commercial females are located at the seller's location.

## Delivery

Bulls will be delivered free for the first 400 miles or 100 miles per head purchased, whichever is more. Additional miles at cost. Delivery will be measured from Miles, TX. If you bring a trailer to haul your own, receive **\$200 rebate per bull**. We can arrange delivery for registered females at a reasonable cost. Delivery will be from Miles, TX. If you bring a trailer to haul your own, receive **\$50 rebate per registered female**. Commercial females will be delivered free for the first 400 miles. Additional miles at cost. Mileage for Halfmann females will be determined from Miles, TX. Mileage for Beckton females will be determined from Sheridan, WY or Miles, TX (whichever is closer).

We will deliver cattle 1 to 3 weeks after the sale, although we will try to accommodate you if you need your bulls right away. We will make every effort to deliver your purchases as close as possible. Please provide a facility where we may unload and reload several bulls. You may also need to accommodate a semi-truck either at your place or by making arrangements with a neighbor, sale barn, etc. All deliveries are at buyer's risk. We recommend insuring your purchases.

## Insurance

Insurance will be available to purchase on sale day at checkout.

## Feeding

Please arrange to pick up or receive your purchases. Halfmann Ranch will begin shipping on the Monday following the sale. We will hold cattle if needed for 10 days following the sale. Afterwards, purchased cattle will be assessed for feed.

## Absentee Bids

If you are unable to attend the sale, we can help you select the bulls or females to fit your needs. We guarantee Sight Unseen Purchase Satisfaction. Contact us or one of the livestock representatives before the sale. Your bid will be handled confidentially.

## Herd Health

We have a comprehensive herd-wide health program which includes vaccinations for 7-Way, IBR, BVD, PI3, BRSV, Lepto, and ivermectin. The heifers are also vaccinated for bangs and vibrio. All Halfmann animals have been tested negative for BVD PI. All the bulls will have a general health and fertility examination by sale day. Breeding information will be available on sale day. Interstate health papers will be furnished for each animal in accordance with Federal Regulations.

## Customer Appreciation Dinner – October 4th, 6 p.m.

The evening prior to our sale we will host a steak dinner and social for our customers. The dinner is sponsored by Boehringer Ingelheim.

## Sale Day Lunch

BBQ burgers will be provided for lunch on sale day. Lunch is sponsored by Red Chain Feeds.

## Auction Format:

Selling in catalog order by recorded video. May bid in person at Halfmann Ranch in Miles, TX, by phone with a livestock representative, or through Superior Productions (see next page for phone and computer instructions).

## Catalog & Promotion

**Branded Spur**

940-648-8810

# Table of Contents

## How To Participate As An Absentee Buyer

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. **Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [superiorlivestock.com](http://superiorlivestock.com).**

---

### Here's How It Works

#### Turn in Bids Over the Phone.

This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to [superiorlivestock.com](http://superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at 817-378-3380 with a signature on it, or scan and email the form to [info@superiorauction.com](mailto:info@superiorauction.com). You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

#### Click-To-Bid.

This is Superior's online bidding program for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of [superiorclicktobid.com](http://superiorclicktobid.com) to sign up. Becoming a member is easy – just go to the homepage of [superiorclicktobid.com](http://superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

#### Viewing the Auction.

The sale will be broadcast via satellite on Dish Network channel 232 (RURAL TV). Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at [superiorclicktobid.com](http://superiorclicktobid.com) – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of [superiorclicktobid.com](http://superiorclicktobid.com) to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

**Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements.**

## Focusing On The Bottom Line

Profit has two sides to the equation, Income & Expense. For many years, some cattlemen have concentrated on how to maximize income, while not paying attention to expense. When times get tough, businesses of all industries tend to become more efficient and focus on reducing expenses. The Red Angus Association recognized this early on and developed unbiased scientific methods to measure economically relevant traits to help cattlemen become more efficient. The most economically relevant traits are Calving Ease Direct (CED), Birthweight (BW), Maintenance Energy (ME) and Stayability.

## The Impact Of Birthweight & Calving Ease

The foundation of animal breeding is fertility and calf survival. Without cows breeding up and weaning a calf every year, producers will incur an economic loss. Using low birthweight, calving-ease bulls with growth will insure a higher percentage of weaned calves and more total pounds of calves weaned. For example, suppose you use a higher birthweight bull that adds 20 more pounds per calf at weaning. If the calves wean at 600 pounds and you lose one calf at birth, the cost of losing one calf is equivalent to the additional 20 pounds of gain on 30 calves. Maintaining a high weaning percentage should be a high priority. Low birth weight is highly correlated to mature cow size. An added benefit of using low birthweight bulls is the surest way of producing moderate-sized, efficient females for the future.

## Stayability

This predicts the ability of a bull's daughters' ability to conceive every year until the age of six. That is how long it takes a female to breakeven given all the expenses of development. Red Angus is the only major breed able to measure fertility in this manner due to the use of THR (Total Herd Reporting).

## Maintenance Energy

This EPD predicts the relative feed energy requirement for maintenance, for cows produced by a sire or female. 70% of cow herd feed costs are burned up in maintaining weight and condition. Feed costs make up by far the largest proportion of operating costs. The ME EPD is calculated using mature weight, milk and body condition score (BCS). Breeders collect cow weights and BCS at weaning. Maintaining moderate framed and easy keeping females is very crucial in our environment. They require less energy to maintain each year and they also breed back more consistently. Our cows must wean a high percentage of their own body weight to be considered efficient. If you can raise a 600-lb. calf each year with an 1100-lb. cow, why would you want to keep feeding that 1600-lb. cow that does the same thing with more grass & feed?

## Using EPDs & Ratios

A common misconception is that EPDs will tell us which animal of several being compared is 'best.' EPDs are merely a description of each animal's genetic make-up. It is up to us to determine which animal is best for us. Selecting for single traits is not always the most effective choice. When selecting a bull, take into consideration all traits that are relevant for your program. By correctly using EPDs, we can each determine which animal best fits our programs, or moves them in a direction we want to go. Ratios are used for comparing within a single contemporary group. Selecting between contemporary groups with actual data can be inaccurate and lead to selection or culling errors! Performance measurements such as growth and marbling may vary greatly between contemporary groups depending on how they are managed and fed. For example, grain-fed animals are more likely to have higher marbling scores than forage-fed animals. However, forage-fed animals may be genetically capable of producing higher marbling scores, but are not fed high-grain rations for other management reasons.

# Red Angus Unveils Reliable, Unbiased Indices

by Larry Keenan, Director of Breed Improvement

The Red Angus Association of America (RAAA) implements a unique approach when developing genetic selection tools. In order to deliver the most reliable and unbiased data to Red Angus stakeholders, RAAA separates sound science from subjective politics and marketing.

RAAA achieves this through implementation of a nonpolitical Technical Committee, which is populated by non-Board members and actually has decision-making powers regarding genetic predictions.

Once the technical committee is provided an assignment – such as developing economic selection indices – it is tasked with overseeing development and ultimately deciding if the tool – or index in this case – is dependable enough to release to stakeholders. While this process may slow the release of a new EPD or index, commercial producers can have confidence that once the tool is released, it is reliable.

Red Angus' work on economic selection indices provides an excellent example of the importance of such committee structure. RAAA previously had the ability to release an index; however, Technical Committee review revealed flaws in the proposed index that essentially caused it to be a marketing tool as opposed to a selection tool.

After multiple refinements to the index development software, RAAA is excited to announce that the Technical Committee has approved the release of the HerdBuilder and GridMaster indices.

## What are Indices?

The purpose of an index (plural – indices) is to estimate differences in an operation's overall profitability resulting from a particular selection decision. In developing an index to evaluate differences in profitability within an operation, assumptions must be made regarding the genetics of the cowherd (ex: average weaning weight) as well as economic values (ex: sale price of cull cows).

RAAA utilized the Red Angus database to determine the required cowherd assumptions. The economic assumptions were derived from input obtained from CattleFax and economic data from Texas A&M and North Dakota State University. Additionally,

certain basic production assumptions are made, such as: Will the bulls be used on heifers and/or cows? Are replacement heifers retained? When and how are calves marketed?

Once these assumptions were determined, the data was fed into a simulation model that accounted for the segments of the beef industry based on the assumptions. Finally, EPDs of the service sires were included in the simulation model to determine the overall impact the sires would have on the operation's profitability.

The EPDs included in the index calculation are independently changed one unit (ex: Stayability EPD of 10 vs. 11), and the resulting change in overall profitability determines the weightings placed on each EPD. It is important to understand that these EPD weightings are not determined, or adjusted, using human perceptions. Thus, the weightings, and ultimately the indices, are completely based on science.

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement. RAAA's indices will be expressed to stakeholders as differences in profitability per exposure. For example, Bull A has an index value of 100 and Bull B has an index value of 150, and the selected bull would be mated to 120 cows over the bull's productive lifespan. Selecting Bull B would add an additional \$6,000 [(150 – 100) x 120] in profitability to the operation as compared to selecting Bull A.

While Red Angus bulls are selected by stakeholders to fit into various production scenarios, selection pressure is typically placed on herd-building traits or traits that increase the value of marketed product. Many producers have even developed their own selection index to assist them in identifying bulls that meet these goals. Typically these include thresholds for certain EPDs, but as most would admit, these thresholds are not strictly followed. Red Angus' selection indices will provide producers with a consistent selection tool built on a scientific, unbiased foundation.

## HerdBuilder Index

As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder

Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny  $\frac{3}{4}$  Red Angus,  $\frac{1}{4}$  Simmental)
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid.

Given that replacement heifers are retained, significant influence is placed on the obvious maternal EPDs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality based carcass grid, Marbling, Yield Grade and growth EPDs impact the HerdBuilder index.

## GridMaster Index

While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass.

Red Angus stakeholders will quickly recognize the term “GridMaster,” as the Marketing Department annually recognizes load lots of harvested cattle with superior carcass observations as “Grid Master” Award winners.

Producers who place emphasis on the GridMaster Index in their selection decisions will not only experience an increase in their operation’s profitability; but as well can expect to see an increased number of calves recognized as Grid Master Award winners.

The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny  $\frac{3}{4}$  Red Angus,  $\frac{1}{4}$  Simmental)
- All progeny sold on a quality-based carcass grid.

Thus, Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

## What if my Production Scenario is Different?

While your operation may differ from the above index scenarios, our research shows that the two above situations will serve as reliable selection tools for the vast majority of ranches.

Use the GridMaster Index if your operation’s primary goal is maximizing profitability of feeders in the feedyard and on the rail.

For example, if your operation matches the HerdBuilder Index, except you would be using the selected bull on cows only, this small difference would not cause a significant change in the ranking of animals.

During committee discussions, the Technical Committee explored creating an additional HerdBuilder-Cow Index, which would use the same scenario as the above HerdBuilder except the bulls would only be used on cows. In comparing the HerdBuilder vs. HerdBuilder-Cow indices, we found that bulls ranked essentially the same between the two indices.

To be exact, the rank correlation was 0.97, which can be interpreted as only 3 in 100 bulls changed rank between the HerdBuilder and HerdBuilder-Cow. Thus demonstrating the robustness of the HerdBuilder Index, in that your production scenario can slightly deviate from the exact scenario in which the HerdBuilder Index was built, and the HerdBuilder Index can still serve as a reliable selection tool.

A quick study of the HerdBuilder and GridMaster Indices reveals that the main difference between these two indices is the source of replacement heifers. If the selected sire will be used to produce replacement females, the HerdBuilder Index should be used. However, if the selected sire will not be used to generate replacements, the GridMaster Index should be used.

Red Angus’ unwavering implementation of science has provided the foundation for the delivery of genetic selection tools with unmatched reliability. This precedence was strictly followed in the development and delivery of Red Angus’ HerdBuilder and GridMaster indices. Thus, stakeholders can have confidence that these new tools are truly genetic selection tools, and not just a marketing tool.

First Takeover son to sell today and we really like him! We used him natural service with our registered heifers so don't be hard on him for coming to you in his work clothes. Takeover x P707 with top EPD percentile rankings and -5.8 BW to 90 YW spread! We can't wait to see what his calves look like next spring. Help yourself to some great genetics!

Sure-shot calving ease + top ranking EPDs + backed by a powerful donor cow + his moderate frame = a bull who has a lot to offer both commercial and purebred cowmen. Whether you want high-quality replacement heifers or high-quality beef - he fits the bill. We collected semen for future use and used him naturally this spring, so he's in his work clothes.

Cow Wgt 1185. The next three bulls come in their work clothes since we used them natural service in our registered cow herd. They went through the same fertility and trich testing as all the other bulls in the sale and are guaranteed just the same. We love the calves they have produce and you will get to see them next year! The first is a moderate easy keeping Synergy son out of a Beckton cow.

**146A-147 LOCATED IN AND DELIVERED FROM MILES, TX.**

Buyer has option to purchase any combination of these lots. Any remaining lots will be auctioned until all are sold.

A uniform set of solid-red commercial Red Angus heifers developed on native rocky rangeland in west Texas. These females are fully vaccinated, BVD-PI tested negative and vaccinated for Brucellosis. They were fixed-time AI-bred to Halfmann Genesis A831 (Ref. Sire L) and cleaned up with low birthweight bulls. The heifers are cake broke with a sire. They were sonogrammed and sorted for calving date.

Donor prospect!! This Mattie matriarch raised our herdsire Hustler W409 (Ref. Sire G). Mattie's are known for their high marbling and T336 posted a 146 ratio on IMF with an actual scan of 5.77% on a high forage diet! We sold an entire commercial calf crop from her son to a grassfed program that had success with the calves (W409 tested for all markers for tenderness).

P BUF CRK THE RIGHT KIND U199

# Terms & Conditions

## BIDDING DISPUTES:

The Auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

## TERMS:

Terms of sale are cash. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released.

## PURCHASER'S RISK:

Each animal becomes the risk of the Buyer as soon as sold. Insurance will be available sale day.

## CERTIFICATE OF REGISTRY:

A certificate of registry will be furnished to the Buyer for each animal, after settlement has been made.

## ANNOUNCEMENTS:

Changes or errors of information contained in this catalog relating to the animals offered for sale will be announced from the auction box and such announcements shall take precedence over printed matter in the catalog.

## BREEDING GUARANTEE:

All animals sold are guaranteed breeders by the Seller. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event an animal is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition, free of disease and complying with the health requirements of the Seller's state. The Seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the Seller shall be obligated, at his option, to refund the purchase price, replace the animal with another of equal value, or grant the buyer credit for use on cattle marketed by the seller. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the Seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense. All animals are guaranteed to be breeders, with the exception of: a) calves under twelve months of age; or b) animals shown by Purchaser after sale; or c) gross negligence or willful misconduct on the part of the Purchaser.

## SELLER'S SEMEN RIGHTS:

Seller keeps a 50% revenue-sharing breeding interest without possession, in every bull in this catalog unless otherwise noted in this catalog or in the sale day supplement. In the event Seller elects to collect semen from a designated bull, it will be done at Seller's expense and during such time when purchaser is not using the bull for breeding. Future semen collections of the bull must be made known to all owners prior to collecting. These collections and costs will be divided according to each owner's interest, unless otherwise agreed upon mutually by all owners.

## LIABILITY:

Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damage of any kind.

## CONTRACT:

The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

## IMPLIED WARRANTY:

Except for those stated in the terms and conditions, there are no warranties or implies, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.
